

# QUICK START GUIDE

Non-POE switch

Applicable Model: TD-S1224GF

Version: 1.0

Date: August 2023

## **Product Specification**

# 26-port full Gigabit Ethernet security switch

#### **TD-S1224GF**

#### **Product description**

TD-S1224GF series is a self-developed unmanaged full Gigabit Ethernet security switch, equipped with 24 Gigabit adaptive electrical ports + 2 Gigabit SFP uplink fiber slots. The photoelectric combination interface allows customers to realize convenient connection and expansion of the network without being affected by the transmission medium. Optimizing the large backplane, large cache switching chip solution, improving the forwarding rate of large files, and effectively solving the problems of video freeze and picture loss in the high-definition monitoring environment. It is suitable for hotels, banks, campuses, factory dormitories and small and medium-sized enterprises to form cost-effective networks.

Non-network management model, plug and play, no need to configure, easy to use.

#### **Features**

Full Gigabit rate, high-speed transmission

- ♦ All ports support non-blocking wire-speed forwarding for smoother transmission.
- ♦ Support IEEE 802.3x full-duplex flow control and Backpressure half-duplex flow control.

#### Equipment is stable and reliable

- The host has low power consumption, active fan heat dissipation design, and metal casing to ensure stable operation of the product.
- ♦ Adopt self-developed power supply and high redundancy design to provide long-term stable power output.
- ♦ The equipment meets the national CCC standard, fully complies with CE, FCC, and RoHS safety regulations, and is safe and reliable to use.

#### Simple operation

- ♦ Plug and play, no need to configure, simple and convenient.
- ♦ Users can easily understand the working status of the device through the power indicator (PWR) and port status indicator (Link/Act).

### **Product Specification**
